

ChannelPlus Model 5500 Series Modulators with IR

The New ChannelPlus Models 5525 and 5545 are two and four channel mono modulators with RF output of 25 dBmV and integrated IR emitters. These new 5500 series modulators bring the advantage of IR control to ChannelPlus' best selling modulator line.

When combined with a DA-550 series distribution panel the 5525 and 5545 will distribute the connected video/audio sources to eight rooms and offer full IR control over the sources. The 5500 series modulators offer the capability to remotely power the DA-550 from up to 75 feet away.

Key Selling Features:

- Frequency Agile
- Integrated IR
- Loop Out Capabilities
- Expandable
